

## Changing Pregnancy Days

In **AfiFarm** you can change Pregnancy days at PD+ but only if the insemination date is later than the last insemination. Entering manually 49 Days pregnant will generate a new insemination which is later than 70 days (ins. 2007/06/20)

General Events Codes Lactation List 10 Days Lactation Characteristics

Add Edit Delete Lactation 1

Events Cow : 5945 Group : 1 Status : Milk Lact. No. : 1 DIM : 185

Date	Event	Event Info
2007/06/20	Insemination	Ins. no.:2; Bull Name: 1*7108
2007/06/20	Heat	
2007/06/11	Veterinary	Drugs:Botulism Vaccine; Vet:Israel Passval;
2007/05/31	Insemination	Ins. no.:1; Bull Name: 0187

Cow	Visit date	Insem. date	Days preg.	Vet	Bull Name	Vet comment	Error
5945	2007/08/29	2007/06/20	70	--			Invalid Date

To suit the **AfiFarm** logic that a cow is pregnant from her last insemination you would need to delete the insemination 2007/06/20 and then it would accept that this cow is pregnant 90 days and not 70 (insemination 2007/06/20)
